

Starfilmseries - Roteiro Completo

Integrantes do Grupo (6 Alunos): MiguelVitoreti,Álvaro,Felype,Evandro,Giovanni e Kelvin

Instituição: ETEC Zona Leste

1. Resumo da Distribuição

Integrante	Papel Profissional	Tópico Aprofundado no Vídeo	Tempo Est.
1. Evandro	Líder de Projeto & Apresentador	Abertura institucional, escopo do projeto, contexto ETEC/IBM e visão geral da solução.	1:15
2. Álvaro	Product Owner / Estrategista	Análise do problema (fadiga de decisão), proposta de valor e jornada de navegação sem fricção.	1:20
3. Giovanni	UX Specialist / Destaques	Análise de engajamento da área de Destaques da Semana, arquitetura de cartões e metadados.	1:20
4. Miguel Vitoreti	Curador de	Estrutura dos acervos de Filmes e	1:20

Integrante	Papel Profissional	Tópico Aprofundado no Vídeo	Tempo Est.
	Conteúdo e Mídia	Séries, critérios de seleção de títulos icônicos e categorização.	
5. Felype	Arquiteto de Navegação e Dados	Mecanismos de busca por gênero, lógica do sistema de Ranking dinâmico e consolidação de notas.	1:20
6. Kelvin	Engenheiro de Software & UI	Design System cinematográfico, ecossistema do Vite, performance de carregamento e considerações finais.	1:30

2. Roteiro

1. Evandro (Abertura, Institucional e Visão Geral)

Fala de Evandro:

Hello everyone! Welcome to our formal video presentation for IBM. We are representants and software development students from ETEC Zona Leste, and it is an immense pleasure to present the culmination of our technical work to you today."

"My name is Evandro Silva, project lead for this initiative, and I am accompanied by my

esteemed teammates: Álvaro, Felype, Evandro, Giovanni, and Kelvin."

(Todos os integrantes aparecem em câmera aberta, sorriem, acenam e dizem em conjunto: "Hello, everyone!")

"Over the course of this academic module, our group set out to build an end-to-end web platform capable of reshaping how audience members interact with media reviews and title selection. Today, we are proud to guide you through the features, design philosophy, and technical architecture of Starfilmseries."

2. Álvaro (Problema de Mercado, Pesquisa e Proposta de Valor)

Fala de Álvaro:

"To truly understand why Starfilmseries exists, we must look at the current digital entertainment landscape. Today, users have access to tens of thousands of movies and series across multiple streaming services. However, this vast abundance has caused a widespread phenomenon known as 'choice overload' or 'decision fatigue'."

"Viewers often waste twenty to thirty minutes scrolling endlessly through cluttered interfaces, reading fragmented synopses, and searching external websites just to check if a title is worth their time. Starfilmseries was specifically engineered to solve this friction."

"Our value proposition centers on delivering a streamlined, highly organized environment where users can evaluate, explore, and select high-quality entertainment in a matter of seconds without unnecessary distractions."

3. Giovanni (Experiência de Usuário na Área de Destaques e Metadados)

Fala de Giovanni:

"When a user visits Starfilmseries, the primary focal point is our carefully designed Highlights Section. This hero banner highlights the week's most trending, critically acclaimed, and widely discussed cinematic works, including global phenomena like Interstellar, Breaking Bad, and Avatar."

"Rather than overwhelming the user with wall-of-text descriptions, each title card consolidates crucial metadata into an immediate visual hierarchy. Users can instantly identify the core genre tags, target audience ratings, release dates, and community scores."

"This approach ensures that even first-time visitors can perform rapid visual scans,

understand the essence of a movie or show, and make informed choices instantly."

4. Miguel Vitoreti (Organização de Catálogo: Filmes e Séries)

Fala de Miguel Vitoreti:

"As users scroll past the highlights, they enter our dedicated content hubs, which are strictly divided into Feature Films and Television Series to maintain logical domain separation."

"In our Film Collection, we showcase iconic works ranging from modern sci-fi classics like Blade Runner 2049 to high-octane action masterpieces like John Wick 4 and epic storytelling like The Lord of the Rings and The Dark Knight."

"In our TV Series section, we curated landmark television productions such as Stranger Things, The Last of Us, Game of Thrones, and Chernobyl. Each entry is housed inside responsive UI cards that feature subtle micro-interactions upon hover, creating a feeling of fluid interactivity."

5. Felype (Sistemas de Filtragem por Gênero e Algoritmo de Ranking)

Fala de Felype:

"To complement linear browsing, we developed a dynamic Genre Navigation System. Understanding that mood dictates viewing preferences, users can filter the entire repository by genres such as Science Fiction, Action, Fantasy, Drama, and Thriller with a single tap."

"Furthermore, we implemented a dedicated Ranking Engine. This feature collects and synthesizes rating scores across the database, ordering titles sequentially based on popularity and quality benchmarks."

"The Ranking Section serves as a trusted guide for enthusiasts who want to bypass discovery and head straight to top-tier, highly-rated cinematic masterpieces."

6. Kelvin (Arquitetura Frontend, Design System, Aprendizado e Encerramento)

Fala de Kelvin:

"From a software design standpoint, our objective was to construct an immersive, cinema-inspired Design System. We combined deep slate backgrounds with high-contrast accent colors, crisp typography, and full-bleed poster imagery to craft an aesthetically

captivating dark theme."

"Under the hood, Starfilmseries was built using modern web standards and Vite as our core build tool. Vite provided us with lightning-fast Hot Module Replacement during development and delivered optimized asset bundling for instantaneous production load times."

"Building Starfilmseries as a team allowed us to refine our skillsets in frontend development, component architecture, UI/UX prototyping, and version control workflows."

"In closing, Starfilmseries unites ratings, media discovery, and sleek design into a single cohesive platform. We extend our sincere gratitude to our instructors at ETEC Zona Leste and to IBM for providing us with this platform to showcase our technical passion."

"Thank you very much for your time and attention!"
